Quality & Environment policy

Mobitec shall be recognized as an industry leader for quality and environmental commitment.

We have integrated quality and environmental awareness in our operations and work with continuous improvements.

Quality

Mobitec ensures that customer requirements are understood. The performance of the products and services meet established requirements and contributes to increased customer satisfaction. We realize that job satisfaction is an important factor in achieving this.

Environment

Mobitec complies with applicable environmental laws and requirements. Decisions on produktdesign is made with regard to the best available technology and economic viability. We reduce environmental impact throughout the product life cycle by being constructed with due attention to environmental aspects so that, during use has as little as possible burden on the environment.
